PUNGUZA™ FOR SEPTIC TANKS

What is Punguza™?

Punguza for Septic Tanks is a natural, safe-to-handle, environmentally beneficial food additive solution that feeds the beneficial bacteria in the Septic Tank. As a result of feeding the beneficial bacteria, they become active. When these beneficial bacteria are active, they do not produce bad odours and they break up the organic solids. By feeding them, we are boosting nature to do what it was designed to do.

Direct Benefits of Punguza™

- Eliminates foul odours.
- Reduces flies, mosquitoes and insects.
- Reduces solids in septic tanks and biodigesters.
- Unclogs blocked flush-toilets.

Indirect Benefits of Punguza™

- Improves the drainage capacity of the soakaway.
- Eliminates the dirty work of emptying the septic tank.
- Improves relations with neighbours due to elimination of foul smell.

Financial Benefits of Punguza™

- Eliminates the cost of emptying the septic tank.
- Improves relations with the Public Health Department.

How to use Punguza™ 60ml bottle

1. Maintaining a healthy septic tank and soakaway: once per week, pour one bottle of Punguza™ (60ml) in one toilet bowl. Flush the toilet twice after pouring Punguza™.
2. If the septic tank is more than half full, pour 3 bottles of Punguza™ in one toilet bowl and flush twice. This is the shock dose. After one week, pour one bottle of Punguza™ in one toilet bowl and flush twice. Repeat weekly to maintain a healthy septic tank and soakaway.
3. These instructions are for a septic tank used by one household of 5-10 people. Adjust the volume of Punguza™ proportionally with each additional 5-10 users.

Results of Punguza™

You will notice the following results when you use Punguza™ according to the instructions above:

1. After 3 days, foul odours will be gone.
2. After 3-7 days, flies and other insects will have reduced.
3. After 1-2 months, you will begin to see a reduction of solids and liquids in the septic tank.

Remember, Punguza™ feeds the beneficial bacteria in the septic tank which will be starving before using Punguza™. Since this is a natural bacterial digestion process, it is very effective, safe and the results are realized gradually.

If you do not get the desired results, call Revive Solutions for advice. We offer a money-back guarantee on Punguza™. Please make sure you use Punguza™ as per the instructions given
