Water and Wastewater Scientists and Engineers

Our Products and Services

We are your go-to partner for water and wastewater solutions for small-scale and large-scale applications. Our products and services include

1. Consultancy

We provide professional and accurate consultancy services before and throughout the lifetime of your water management project, whether small or large. The consultancy includes:

- (a) Development of sustainable water supply strategies to help you determine and quantify the available water resources, the required treatment, storage and distribution infrastructure, and strategies to manage the water resources.
- (b) Concept and detailed water and wastewater infrastructure design.
- (c) Water demand calculations for master plans
- (d) Hydrogeological surveys
- (e) Riparian mapping, flood mapping and drainage design.
- (f) Water and wastewater sample collection, analysis, and result interpretation.
- (g) Obtaining permits- effluent discharge license, borehole abstraction

2. Water Purification

We design, build, and service water harvesting & treatment solutions including:

- (a) Point of entry (PoE) reverse osmosis (ROs) and filtration systems
- (b) Point of use (PoU) reverse osmosis units
- (c) PoU dispenser ROs for hot and cold water

3. Restoration & Creation of Surface Water Bodies

- (a) Restoration of water quality and riparian ecology of natural water bodies and river networks.
- (b) Designing, building, and managing of artificial water bodies for rain water harvesting, recreation, and aesthetic value.

Creation and restoration of water features

From this

Desired Future/original past

4. Wastewater Management & Re-use

Designing, building, and servicing wastewater treatment and recycling plants.

5. Natural Punguza™

Safe, non-toxic, and nature-based odour control range of products. They Include

- (a) Natural Punguza™ for Pit Latrines – Eliminates smell, reduces insects attracted to bad smells, and gradually reduces solids.
- (b) Natural Punguza™ for Pipe Unclogging – Unclogs drains, digests fats in grease traps, and eliminates odours in sinks and floor traps.
- (c) Natural Punguza™ for Septic Tanks – Eliminates smells and improves solid reduction in septic tanks, biodigesters, and other flush toilet systems.
- (d) Natural Punguza™ Farm Odour Control – Eliminates odours in animal confinements, manure composting, and accelerates composting.
- (e) Natural Punguza Odour Control Spray - Eliminates odours in washrooms, portable toilets, waste bins, sanitary bins, carpets, and pets.

- (f) Natural Punguza Solid & Odour Control – Multipurpose use for largescale applications in restaurants, schools, industries, farms, and mixed-use developments among others.

Our Impact

1. Volume of drinking water purified +226,030 litres/day.
2. Volume of wastewater treated +2,470,000 litres/day
3. Volume of wastewater recycled +100,000 litres/day
4. Number of water features and wetlands created and restored +11
5. Number of riparian zones protected + 3
